# STONY PLAIN SUN.

VOLUME THIRTEEN

STONY PLAIN,

ALBERTA,

THURSDAY, MAR. 23, 1933

Whole No. 653

## ROYAL CAFE, STONY PLAIN.

(Phone 38)

Easter Novelties—Bunny Rabbits, Chocolate Chicks, Colored Eggs—A Good Assortment, Reasonably Priced.  
TRY OUR SPECIAL DINNER—25c. and Up.  
FIRST-CLASS FURNISHED ROOMS TO RENT.

L. M. LARSON, Proprietor.

### Change to Be Made in Our Federal Riding.

A despatch from Ottawa states that plans of the Bennett government for the redistribution of parliamentary seats in Alberta contemplate several changes in Calgary and Edmonton West, and by the creation of a new constituency to be known as Jasper. The Jasper constituency will be bounded on the north by the constituency of Peace River; on the south by Red Deer constituency; and on the south and east by Wetaskiwin and a small part of what is now Edmonton West. It will run west to the British Columbia boundary, and will include Edson and the coal district. To this new constitu-

### No Passengers on Trucks.

The Police have been instructed to prosecute those truck drivers who persist in violating the regulations regarding the carrying of passengers on their vehicles. On Friday, at Red Deer, a truckman was given a nominal fine of \$2 for carrying two neighbors in his conveyance.

ency would be attached Morinville and Legal, now in West Edmonton.

Edmonton West will include St Albert and a small country district west and north of the city of Edmonton, along with Edmonton proper to the boundary of Edmonton East. Edmonton East would be un-

### Stony Plain and District

Mr and Mrs Franklin K Clarke of Jasper are visiting with Mr and Mrs J F Clarke.

Mine Host Larson of the Royal Cafe opened the warm weather season on Sunday by installing the green settee in front of his food dispensary.

On Sat. At. next, March 25th, Stony Plain U. F. A Local will hold its regular monthly meeting in the U.F.A Hall. Among other matters, a distribution of the bonus among members of the section of the Stony Plain Constituency Co-operative society will take place.

St Philip's branch of the Catholic Women's League will meet at the home of the president, Mrs E Callahan, on the evening of Saturday next, the 25th March. A good attendance is expected.

The Stony Plain band, under Bandmaster Gus Barth, gave a concert at the rink for the benefit of the skaters, on Thursday Evening last. There was a very good attendance of those on skates and of those who only leaned on the rails, and these gave very generously when "the mat" came 'round.

## Get It at HARDWICK'S.

### Some of Our Weekly Specials:

Ladies' Spring Hats, just in, \$1.95 and \$2.95.

Children's Dresses, right up to the minute, 79c.

Ladies' Dresses, from 79 cents.

A Full Line of Men's Footwear for Spring, at the lowest prices for many years.

As usual, lots of Grocery Specials.

## HARDWICK'S

Agents Alberta Dairy Pool Cream.

### ANDERSON'S BAKERY.

Fresh Bread Every Day—4 Loaves for 25c; 18 for \$1.  
ALL KINDS OF PASTRY AND PIES.

See our SATURDAY SPECIALS in the Window.

PAUL ANDERSON, - Proprietor.

### Hockey "Close-Ups."

Now that the hockey season is closed, a summary of all such activities including senior, junior and juveniles, is quite in order, and may it act as a source of encouragement for the continuation of similar activities next season. The brand of hockey is becoming increasingly better as time goes on, and with the further development of both junior and juvenile hockey, which should have been instituted long ago, one may safely say that before long Stony should be able to field a senior team quite on a par with those of the intermediate sections throughout Alberta.

The only addition or improvement that is of supreme necessity, as many know, is in proper coaching; let's hope this will come in time.

It may amaze the people of Stony Plain to know that there are no less than fifty youths in the three sections who are really serious minded players. In the junior and senior groups together there were about 22 home & home games in all played, involving about 500 miles of travelling, the expenses of which were paid by the individual players. In spite of the fact that the teams played under no guarantee scheme, the club finished with a small surplus financially—quite contrary to the times, perhaps.

The following is the scoring

	list and standing of the senior team—
J Miller	10 4 14
G Miller	10 2 12
Hy Trapp	7 3 10
H Oatway	7 3 10
W Rosnau	6 3 9
P Enders	2 5 7
D Moyer	4 1 5
M Larson	4 0 4
O Miller	2 1 3
H Wolfe	0 2

In conclusion, may I express my personal gratification to the officers of the senior club, and especially to the finance committee, for the satisfactory manner in which the club activities were carried out.—O Lorne Oatway.

### Heard on Main Street.

A man of diminutive proportions sat down at the restaurant table.

"I want some salad," he said.

"What kind, shrimp?" asked the waiter.

"Now, young man, don't you get funny with me!" replied the customer.

### Schedule of Mails.

From the East—Sun. Tues. and Thurs. 10:47 p.m.

From the West—Sun. Wed. & Friday, at 8:15 p.m.

Mail to East—Sun. Wed. Friday at 8:15 p.m.

Mail to West—Sun. Tues. and Thurs. at 10:47 p.m.

Reg. dispatched and received with every mail.

## CHEVROLET OFFERS

TWO Lines of Cars—TWO Price Ranges  
ONE HIGH STANDARD OF QUALITY

THINK OF IT, *now*. . . A big, full-size, five-passenger, six-cylinder closed car—for less money than any similar car on the market! And it's a CHEVROLET!

First came the Chevrolet Master Six, welcomed as no other car has ever been since 1929. Now comes the Standard Six—and everybody is talking about this newest addition to the Chevrolet line!

It's a Chevrolet through-and-through . . . with the same basic quality that has given the Chevrolet Master Six first place in nation-wide sales ever since its introduction. Both Standard and Master Sixes offer you Fisher No-Draft Ventilation . . . Safety Glass windshields and ventilators . . . Air-Sreamed Bodies by Fisher . . . Silent second gear and easy-shift transmissions!

And in the new Chevrolet Standard Six you enjoy this quality at the lowest operating cost in the world for a full size automobile—and at the lowest purchase price for a six-cylinder closed car! We're waiting for you at our showrooms. For here is a low-priced car that no buyer can afford to miss seeing—today!

**SIX-CYLINDER ENGINE**  
It develops ample power, is mounted in flexible rubber, and is easily the smoothest six-cylinder engine in the field—reaching mile-a-minute speed with a minimum of vibration and effort. Among the quality features of the power plant are pressure lubrication, down-draft carburetor, and crankcase breather.

**FISHER BODIES**  
The new Chevrolet Standard Six is one of the most beautiful cars on the road. Its Fisher Body has the new wind-stream styling and skirted fenders that characterize the Master Six model.

**NO-DRAFT VENTILATION**  
With Fisher No-Draft Ventilation, each passenger can regulate exactly the amount and direction of the air entering the car. A screened cowls ventilator is available when maximum cooling is required. Doors are of the over-hanging type, completely eliminating drafts.

**SAFETY GLASS**  
A Duplate Safety Glass windshield, sloping at the non-glare 10 degree angle, is standard equipment on both Standard Six and Master Six models. The ventilating wings are also made of Safety Glass.

C-120

**CHEVROLET LOW PRICES**  
STANDARD SIX . . . \$723 to \$770  
MASTER SIX . . . \$789 to \$977  
DELIVERED AT FACTORY, OSHAWA, ONTARIO  
(FREIGHT AND LICENCE ADDITIONAL)

PRODUCED

**SOMMERFIELD & MAYER,  
STONY PLAIN.**

## A Financial Jig Saw Puzzle.

The fact has been noted in this column on previous occasions that during the past two or three years everybody has been discussing the monetary situation prevailing in the world today, and expressing opinions and offering solutions in regard thereto, even though they lacked the most elementary knowledge of the subject. People informed and uninformed, from the most outstanding economists and financiers to the most indifferent student or casual newspaper reader, have discussed banking, currency, credits, the gold standard, inflation, deflation, international exchange, and a host of allied subjects, with the same freedom and frequently with the same orurance with which they are in the habit of discussing the weather.

This, of course, people have a right to do, but the net result has been the dissemination of a vast amount of misinformation and utterly unsound theories, the outcome of which is that large numbers of people are not thinking straight on this important subject, while the majority of the population are hopelessly bewildered and confused, and do not know whose or what opinions to accept as sound and a safe guide to action.

Now this is to be wondered at, because even some of the most generally accepted theories—those advanced by world famous economists—have been proven incorrect when put to the test of actual experience. This was demonstrated in most startling fashion in the United States in the last few days of February and the first days of March. Events across the line moved with great rapidity, and the outcome was to upset previously held views in some important particulars.

Great Britain went off the gold standard in order to check the draining away of its gold reserves and to stop the export of gold from the country. It frankly and officially announced it had gone off the gold standard. The United States had accumulated more than a third of all the gold in the world, yet it, too, reached the point where it was necessary to stop all gold export, just as Canada had stopped it. But, unlike Great Britain, both Canada and the United States insisted they were still on the gold standard. So, people are asking, what is a gold standard? Just what does it mean?

But the most surprising development of all came in the United States. The Government authorized the issue of some billions of dollars of new paper money which was not backed by gold at all, yet the Government insisted the country was still on the gold standard. The issue of this new currency was out-and-out inflation, nevertheless the Government announced it was "sound money," notwithstanding that it had no gold backing, because it was supported by legal assets.

Now, according to formerly generally accepted financial opinion, the issue of such new currency unbacked by gold would have the effect of depreciating the value of the country's currency. That is, the United States dollar would drop in value in relation to the currencies of other countries. The amazing thing that happened was, instead of the United States dollar being worth less in terms of Canadian dollars or British pounds, it actually increased in value and was worth more. The discount on the Canadian dollar in the United States was increased, and the premium on the United States dollar in Canada became larger.

This process was exactly the reverse of what every financial authority and authoritative economist in Canada had been telling the people of this Dominion would be the effect of inflating our currency by the issue of new paper money which was not supported by a gold backing. Such inflation, we were told, would be the abandonment of "sound money," would result in a further depreciation of our money on the world's money markets, and would seriously injure our credit. But the United States proceeds to inflate to the tune of billions of dollars, the Government declares it is "sound money," and instead of United States dollars depreciating on foreign exchange markets, they actually increase in value.

If this is the effect in the United States, why should an exactly opposite effect be the result in Canada if a similar policy was indulged in? It will be interesting to hear the explanations of our Canadian financiers and economists.

It has been widely contended that inflation should be indulged in by Canada to an extent sufficient to bring the Canadian dollar to a parity with the British pound and thereby promote a larger exchange of trade between the two countries and secure to the primary producer in Canada a better price in Canadian dollars for the products he sold in Great Britain. But, it was likewise argued, another effect would be to increase the already heavy premium Canada is now obliged to pay on all its commitments in the United States.

But, as already noted, inflation in the United States has not worked this way, but in exactly the opposite way. It has not brought the United States dollar near the British pound, but farther away from it. It has not decreased the premium which Canada has to pay in New York, but increased it. If inflation worked the same way in Canada it would not prove an advantage to the primary producers, who have been urging inflation, but impose a further loss upon them; it would not add to the burden of our governments and business interests having large commitments to meet in New York, and who have therefore opposed inflation, but it would assist them.

It is all far more complicated and confusing than a jig-saw puzzle because the pieces do not fit together at all, while in the popular puzzles of today the pieces can be made to fit.

## Empire As Security:

The British Empire was put up as security for a loan of \$3,000 in the United States money to pay off the 500 sailors of the British cruiser "Norfolk" in New Orleans, on a courtesy call. The ship's payroll date fell due with all banks closed and the sailors faced shore leave without spending money.

## Work Of Flying Squad

The famous flying squad of Scotland Yard made over 600 arrests last year. Four hundred and fifty cases involved violent prisoners and one hundred and fifty of them carried arms. The Flying Squad has less than forty members.

Her Heart Was Weak  
Nerves Shaky, Nights Restless

Mr. A. Black, Wallaceburg, Ont., writes: "I suffered from heart weakness, shaky nerves, and restless nights."

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very thankful to me that I did as they have proved of wonderful help to me."

I am now strong and well again, but am never without a box in the house."

For sale at all drug and general stores; purvey only by The T. Milburn Co., Ltd., Toronto, Ont.

The smallest quantity of light ever detected electrical energy—that of a flow of three electrons—has been caught and measured.

\*Processes for refining used oils are being tested in Italy.

## For Five Complete Sets of Poker Hands

You can obtain a pair of first quality Ladies' pure thread Silk Stockings, 45 gauge. Combined with excellent wearing qualities, these Stockings have the dull, sheer appearance which is so desirable, and they are obtainable in the latest shades. Sizes 8½, 9, 9½, 10.

There is genuine economy in rolling your own with Turret fine cut, as you can make more than 50 cigarettes from a 20c. package.

FINE CUT CIGARETTES  
Papers with every package.

## Wheat In Perfect Condition

Inspection Shows Wheat Stored In Good Shape

The 2,500,000 bushels of wheat in the Churchill terminal elevators are in perfect condition, according to T. O. Cliff, general superintendent of the plant, who arrived at The Pas, Man., aboard the bi-monthly "muskeg," and a staff of experts, as well as representatives for the board of grain commissioners, Winnipeg, spent two weeks inspecting the grain in storage in the port.

Tests were made concerning temperatures in a number of bins. The power plant was also put into operation, and was said to have functioned well.

This was the first mid-winter test of grain in Churchill. It is said that the first elevator operating crew will move into port about the middle of May.

Passenger from Churchill stated that the shore ice at the mouth of the harbour extended about three miles into the bay. One man versed in harbor work under low temperature standards that ice-breakers could open Churchill harbor for shipping now, so far as the port was concerned.

## Returned To Land

Over Three Thousand Families Assisted By C.N.R. Last Year

Not since the war has Canada experienced such a landward movement from urban communities as that which has taken place during the past year, according to a report issued by Dr. W. J. Black, director of colonization for Canadian National Railways.

The department has assisted 3,402 families during the past year in finding new farm homes, involving a total of half a million acres of land.

The department also co-operated in the settlement of 1,113 unemployed families under the relief settlement plan, financed on a tri-partite basis by the Dominion and Provincial Governments and the municipalities in which the families had lived.

## Queen Prefers Comedies

Nothing Else On Talkie Program Chosen By Queen Mary

The Queen's preference in moving pictures is for comedies. So the public learned when it visited the theatre where the Queen saw her first talking picture. The program chosen by Queen Mary was composed entirely of comedies, headed by a popular British film. Proceeds were devoted to the Richmond Hospital. The younger members of the Royal Family have been "talkie" fans for a long time.

## Fruit Trees In Canada

There are 279,472 acres planted to fruit trees in Canada, according to information obtained from the decennial census taken in 1931. On this acreage there are 10,548,918 apple trees; 1,015,465 peach trees; 601,502 pear trees; 22,870 plum trees, and 667,705 cherry trees.

## Lakes Failed In Ice Yield

Nova Scotia Faces Ice Famine Due To Mild Winter

Nova Scotia is facing an ice famine and no matter how much the prices of other commodities may drop, the price of ice is due for a sharp rise next summer. The thousand lakes which have hitherto yielded an annual harvest to the ice men have failed in their yield and instead of the customary sixteen to twenty inches have shown only three to six inches.

Truro is probably the only town in Nova Scotia where the cutters were unable to sink their blades into the usual depth. Truro icemen are preparing to stock an extra supply to meet demands from the outside market.

Winter passed Nova Scotia, and particularly Halifax very lightly in 1932-33. Following the warmest December in 29 years, January and February were unusually mild. The thermometer did not touch the zero mark and while terrific storms swept the coast these were mostly rain and wind.

## Caribou and Fish Plentiful

Trader Says Depression Means Little In Sub-Arctic

Depression means little in the north country where there is abundance of fish and large herds of caribou, according to James Darvish, fur trader of Fort Rae, on Great Slave Lake, which was the trader's first trip out of the "territories" in 20 years.

Modern conveniences, such as the radio and aeroplane, have greatly changed life in the sub-Arctic. Mr. Darvish said, "The 700-mile journey from the end of steel to Fort Rae, formerly a month's trek by dog team, today is covered by plane in six or seven hours."

Mails are delivered monthly in place of the old half-yearly service, and a fur trader now can move his furs "outside" and sell them shortly after they are trapped.

## Scotland Yard Used Movies

Film Showing Man-Hum Shown In English Theatres

Scotland Yard is now employing motion pictures to trace criminals.

One of the most intensive manhunts ever instigated by Scotland Yard was recently carried on in Great Britain and motion pictures were said to have been playing an important part.

Films showing a police description and pictures of a man wanted for murder were currently shown in practically all of the theatres in England with an appeal to the public to assist in the search.

## Conserving Motor Fuel

Following the increased use of horses everywhere, word now comes from Greece that the days of the motorcar are numbered. As a fuel conservation measure, those bearing even-numbered license plates can be operated only on Monday, Wednesday and Friday, and those with odd numbered plates on Tuesday, Thursday and Saturday.

## Fortune In Antiques

Furniture Discovered By Collector Makes Hotel Owner Rich

A hotel owner in New York has earned his hard-earned money in the lobby of his hotel, gold mine in the lobby, antiques and works of art valued conservatively at more than \$200,000. The treasures had been there 10 years, and were regarded as just so many ornamental additions to the hotel's standard equipment.

An antique collector, passing through the lobby, fell on his knees in front of a \$3,000 Louis XV. parquetry desk, searching for the maker's name. It was being used as a common writing desk in the ladies' writing room. Nearby was a \$10,000 English grandfather's clock, an Elizabethan table of carved oak, some rare marble and bronze statuettes and huge Italian marble mantelpiece worth \$50,000. The collector sought out the owner, and offered to buy certain articles at prices which made the hotelman immediately consult a lawyer.

The owner said the things had been collected by his father-in-law, now dead, who was former owner of the hotel. They had been placed there after his death because the heirs had no other place to put them.

## Placing the Blame

Sun Spot Caused Recent Radio Disturbance Says Professor

Was your radio full of rumbles, roars, squawks and squeaks during a recent week? If it was, blame the sun, says Professor John Gold, director of the Bucknell University Observatory.

Through a telescope, he said he spied a spot on the sun, with an estimated diameter of 5,000 miles. This spot was at the minimum of its cycle, unusual at this stage. Professor Gold said similar but much larger spots upset telegram and telephone systems November 17, 1882.

"Poetry should be written on one side of the paper only, shouldn't it?" asked the young versifier.

"That depends on the poetry," replied the editor, wearily. "Lots of it shouldn't be written on either side."

## Sure Signs

of kidney troubles are pain in the back, difficult urination, deposits in urine. Gin Pills relieve kidney trouble by gently soothing and healing the inflamed tissues. 50¢ a box at all druggists.

W. N. U. 1936

## Spectacular Scenic Route For Prairie Motorists Through Rockies To The Pacific Coast

One of the most spectacular routes available to the motoring public of North America passes through the very heart of the Canadian Rockies, traversing the great mountain playgrounds of Banff and Yoho National Parks. Providing access to such well known beauty spots as Lake Louise, Moraine Lake, and the valley of the Ten Peaks, Emerald Lake, and the Yoho Valley, the western half of this highway is continuous but for the uncompleted section across the Selkirk Range. This last named section, which is known as the Big Bend Highway, is being jointly constructed by the National Parks Service of the Department of the Interior and the Government of British Columbia.

Pending the completion of the last link in this trans-mountain road now under construction, along the great northern bend of the Columbia River, motor tourists may bridge the Selkirks by shipping their automobiles via Canadian Pacific Railway from Revelstoke, B.C., to Golden, B.C., or vice versa. With the exception of these 91 miles which must be made by rail, an uninterrupted trip may be enjoyed from the Coast to the Prairies.

A special service providing for the carriage of automobiles between Revelstoke and Golden will be inaugurated on June 15, and extending to September 15, semi-weekly in each direction in passenger train service. Automobile baggage cars will be attached to regular passenger train No. 2, eastbound from Revelstoke on Saturdays and Tuesdays, and to train No. 3, westbound from Golden on Sundays and Wednesdays. This arrangement will provide motorists with a direct route to or from the Pacific Coast through the Canadian Rockies.

The train journey between Golden and Revelstoke will be made by daylight, and there will be no delay or unnecessary expense to motorists that their automobiles will be carried on the same train and made available for immediate delivery on arrival at Golden or Revelstoke.

The rates for carriage of automobiles between the points mentioned will be according to wheelbase, as follows: wheelbase up to 115 inches, \$12.50; wheelbase over 115 to 125 inches, \$15; wheelbase over 125 inches, \$17.50.

Each automobile must be accompanied on the same train by at least one passenger holding regular first-class ticket, single fare, \$3.65. All other occupants of the automobile travelling by train must hold valid railway transportation. Automobiles should be delivered to the Company's agent at shipping point at least one hour and thirty minutes prior to departure of train, or approximately before 11:35 a.m. at Revelstoke, and 12:45 p.m. at Golden.

The advantages of this service in providing tourists travelling either east or west with an all-Canadian route are obvious as formalities with immigration or customs officials are made unnecessary.

### Experience Is Required

To Determine Best Time For Turkey Egg-Laying

Just as soon as the spring weather comes, turkeys should be fed for egg production, and laying should commence about the middle of April in Eastern Canada and somewhat sooner in Western Canada, with its earlier spring opening—especially in British Columbia, says Mr. A. G. Taylor, Poultry Husbandman, Dominion Department of Agriculture. Much depends on the weather becoming really springlike as to the time for forcing for laying, as eggs laid too early would have to be held too long before setting. This important question must be practically left to the discretion of the attendants. To get turkeys laying just at the proper season requires experience, and beginners should be cautious in this regard. Turkeys should be wintered when they are expected to lay in the spring.

### Official Bird For B.C.

Naturalists Recommend Towhee, But Many People Prefer Robins

Naturalists are urging British Columbia to adopt the towhee as the official bird of the province. The chief objection to the choice is that practically no one knows what a towhee looks like. In fact, a majority of British Columbians probably never heard of the bird until the present agitation arose.

The towhee of British Columbia is a large gray-breasted bird with a black head, having two white primary wing feathers of a distinguishing character. It is loyal to B.C., although it is known in the neighboring state of Washington.

The chief rival of the towhee as the official bird is the robin. Supporters say it is a more colorful bird and it stays in this province the year round.

The towhee is a member of the sparrow family and is able to exist on next to nothing, so far as food is concerned. It is of the general pipit, and oscipila, but those who object to the towhee say that these names are not in its favor.

By Ruth Rogers

991

### SPRING IS IN THE AIR

It's so fresh and lovely in crepe print.

It's all puffed up about its sleeves! And isn't the buttoned wrapped blouse smart?

It's lovely now 'neath the winter coat in a vivid red or blue and white print in crinkly crepe silk. And you can wear it right through the spring and summer.

It's easily made and will cost so little.

Style No. 991 is designed in sizes 14, 16, 18, 20, 22, 26, 28, 30 and 40 inches bust. Size 16 requires 3 1/2 yards of 36-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Syrup From Sugar Beets

Method Simple and Easily Carried Out In Home

Owing to the many inquiries being received from farmers who wish to make an edible (table) syrup from sugar beets the Division of Chemistry at the Experimental Farm, Ottawa, has been making further experiments to ascertain the possibilities of making a palatable wholesome and good appearing syrup for home use. The method is quite simple and can easily be carried out in the home and is as follows:

The beets are first washed and the crowns cut off at the lowest leaf scar, or lower, and the beets peeled, crowns and peels being rejected. The beet is then sliced longitudinally (lengthwise of the root) and put through a meat chopper. This ground pulp is put at once before oxidation takes place, into a piece of cheese cloth which has been tied over the top of a fairly large pot containing water. The pulp is then suspended in the cheese cloth over the water but not touching it. Air is passed over water in the pot should be introduced to start with. Put on a tight lid and boil for half an hour vigorously. After half hour boiling, wash pulp with warm water allowing this wash water to run into the pot, using as little as possible. Fill the cheese cloth bag with pulp two or three times using the same solution in the pot for steaming the second and third batches. Filter this weak sugar syrup through a good cotton cloth and evaporate it to less than half its volume. Allow this to stand overnight so any solid matter that has come down during the evaporation may settle out. In the morning pour this clear syrup off the solids and boil down to consistency of maple syrup taking off any scum that comes to the top and being careful not to scorch or burn. Bottle or put in jars while still hot and seal tightly.—Experimental Farm Note.

### Entry Depends On Tests

Hubert Scott-Paine, British challenger of Gar Wood for the Harmsworth trophy, has announced through J. Lee Barrett, secretary of the Gold Cup committee, that he will enter a craft in the race this fall unless experiments this summer prove to his satisfaction that he has a worthy challenger of Wood's boat.

The man who built a two-car garage in 1928 was foreighted after all. He keeps the car on one side and lives in the other.

### + Do You Know? +

Photograph, Canadian National Railways

**T**HAT a porcupine cannot shoot his quills though many people believe that he can? The outer ends of porcupine quills are sharp and barbed, and they fall off on any foreign body with which they come in contact. They are favored by the animal in a sort of sheath from which they pull easily. The porcupine favors a style of fighting in which he turns his back on his enemy and swish his tail and woe betide anyone so bold as to come close enough for it to hit him. The porcupine can be killed by blinding the nose area as his meat makes palatable soup he has been the life of many a woodsmen in the woods. Except in such emergencies no woodsmen will kill a porcupine, which because of his bad temper and his quills, leads probably the most dangerous animal in the forest.

Viewing life from a stamp in Algonquin Park, northern Ontario, Canada.

## The Interesting History Of The Development Of Instruments For The Aid Of Navigation

### New Type Of Hen

Canada Endeavors To Evolve Bird To Conform To New Specifications

The department of agriculture is looking for a new type of hen. The burly Plymouth Rock which combines great egg laying qualities with a plump and substantial body and has long been considered the popular dual-purpose bird, will not do. Neither will the sleek Leghorns, a small bird but an abundant producer of big eggs. The Rhode Island Reds and the varieties of Wyandottes also fail to make the specifications.

With Canada went after a share of the poultry business of the United Kingdom. It was found Canadian chickens were too big. The British housewife wants a chicken that weighs 3½ to 3½ pounds.

Chicken raisers in Nova Scotia and British Columbia are seeking to develop such a strain, by cross-breeding. The competition will probably spread all over Canada.

What is wanted is a pullet that will weigh 2½ pounds before it is fatted; that is plump and compact and will lay two-ounce eggs and plenty of them. Those are specifications and officials of the poultry division are confident such a hen can be developed.

### Aiding the Blind

Braille Magazines Have Been Published in Many Languages

Approximately 50,000,000 pages of braille literature in the form of books, magazines and music have been produced for the blind by the American Braille Press for War and Civilian Blind during the 10-year period of service just ended, according to William Nelson Cromwell, president and founder of the organization.

Reading matter and music published by the American Braille Press have been distributed in more than 40 countries, Cromwell said. In addition to three monthly braille magazines in English periodicals are published in French, Italian, Polish, Romanian, Serbian, Spanish and Flemish.

An elastic glass has been invented in Germany which neither breaks nor splinters.

Another important event that occurred during the early part of the Eighteenth Century and which deserves more than passing notice was the perfecting of the chronometer, by the brothers Harrison, thus enabling mariners to find their longitude with an exactness hitherto impossible. Latitude, the distance north or south of the Equator, was fixed in the eighteenth century by observation with the quadrant, which was a moderately reliable instrument; but longitude, the distance east or west, had eluded both navigators and scientists alike from the beginning of history. Phillip III. of Spain offered a prize of 1,000 crowns to anyone who could discover a satisfactory way of finding longitude, and then the States of Holland, and others, that they would award 10,000 francs to the successful solver of the problem.

Nothing, however, came of these offers, and inability to determine their longitude still remained a cause of frequent disaster to sailors on badly charted coasts. Wrecks were of common occurrence, and lighthouses were few. Indeed, as we know them now they did not exist. Apart from the remains of the Roman pharos at Dover and at the Isle of Wight, the few coast lights were pale beacon fires placed on some of the more prominent headlands of the European coasts.

The tragic loss of Sir Clowes Shovel's fleet in October, 1707, on the Scillies moved the English Government to offer a prize of 20,000 pounds for the discovery of a method of finding longitude with reasonable accuracy. After many years of the most patient work and experimenting John and William Harrison, in 1755, constructed a reliable chronometer, and the prize, after much delay, was paid in full. Thus the chronometer did for longitude what the quadrant and sextant had done for latitude. T. Ridge in The Twentieth Century.

### London's Lord Mayor

Spends Half His Time Dressing For Formal Functions

Sir Henry Greenaway, Lord Mayor of London, is a martyr to dress. His job in one of the hardest in the world. Hardly a minute of his day is not taken up with some formality or function.

If that were all it might not be so bad. But Sir Henry must pass approximately half his time dressing for a score of these affairs, strutting into heavy robes and decinating himself with the costly ceremonial trappings required of London's Lord Mayor.

The Lord Mayor in a year must foot the bill for about \$50,000 worth of banquets and receptions, not to mention the expensive Lord Mayor's Show and his ceremonial wardrobe.

For everyday he wears a scarlet robe decorated with lace, embroidery, gold chains and other impressive impedimenta.

For evening wear, the Lord Mayor dons a black-damask robe trimmed with gold, somewhat like the splendid outfit of the Lord Chancellor.

### Reminded In Time

A traveller who was renowned for his tall stories, on being called out to dinner, made arrangements with his friends who were to accompany him that they should kick him if he began to go too far.

Quite early in the evening he started off.

"That reminds me," he said to the hostess, "of a friend of mine who had a rose garden over 10 miles long and—he felt a kick—and two inches wide."

### Flexible Window Glass

An inventor in Austria has produced a synthetic window glass, warm to the touch, and somewhat flexible. The process developed for the new "glass" is a closely held trade secret but it is understood that a chemically treated wood product is an important material used.

Pretty girls are becoming successful smugglers in Europe.

## WORLD HAPPENINGS BRIEFLY TOLD

Royal air force estimates for the current year, £17,426,000, an increase of £26,000.

The national organization of silver fox breeders in Canada inspected 23,569 adult and 27,990 pup foxes throughout the Dominion last year.

Appointment of George W. Muir to the post of Dominion animal husbandman of the central experimental farm at Ottawa has been announced.

After five years of research and experimentation, Dr. M. Tokugawa has developed an odorless onion in his private garden in Fukuoka, Japan.

A new port record for grain loading was made recently at Vancouver, when 299,600 bushels of wheat were put into the hold of the S.S. Nimoda in 7 hours and 20 minutes.

Cost of Ontario to date of trans-Canada Highway construction is \$6,926,110. Hon. William Flinlayson, minister of lands and forests, has announced. One half the sum will be paid by the Dominion Government.

Appointment of a federal loan council to guarantee all refunding issues in the western provinces for the next five years was urged in the Alberta Legislature by D. M. Duggan, Conservative leader.

Crop production should not be curtailed even during these times, declared M. J. Conner (U.F.A., Warner), when speaking in the Alberta Legislature in the debate on the budget.

The federal government has given no formal permission for the Beauharnois Company to export power to the United States, Premier R. B. Bennett announced in the House of Commons.

A case of leprosy has been found in Toronto and the patient, a man, was sent along in a colonist car to Tracadie, N.B., where a colony of lepers is established. It is believed the man was seized with the disease in January. He had worked for seven years in South America.

The body of Edith Cavell, war nurse, is interred in Norwich Cathedral, England.

### For Creamed SOUPS AND SAUCES

You can get St. Charles Milk you will be surprised at the improved flavor it gives to cream soups and sauces. It is the best accompaniment for bread and with it you can have your soup and sauce and your family will enjoy.

Always ask for St. Charles by name and then you can be certain you're getting the best evaporated milk.

### For Greater Safety

#### Ontario Government Doing Away With Ditches Along Some Highways

On some of the highways the Ontario Government has already taken steps to fill in the deep side ditches and make provision for the safety of pedestrians. It may be impractical to carry on work of this nature on a large scale at the present moment owing to the necessity of conserving finances. The present depression lifts, however, and the treasury is in a position to provide the money there should be no further reticulation in this matter—the Government should go ahead, do away with the ditches, build highway paths, and afford pedestrians the accommodation they are entitled to.

### DRAPERY MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, but when I took them in the creases were still there. Then I forgot them. The result was they became badly faded and sun-spotted."

"It was heartbreaking until I happy thought of Diamond Dyes. I dyed them, I just dyed them a deep green, and as I used Diamond Dyes they look gorgeous and new. I have never seen such dyes as these. I am so pleased with them. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J. F. T., Montreal.

### Sending Art On Tour

#### Would Enable People To See Works Of Famous Artists

Sir Philip Sassoon is chairman of the British National Gallery, and it is interesting to learn that he has expressed himself in favour of sending collections of famous paintings to other parts of the world, particularly the British Empire. Little enough is known in Canada about British artists, ancient or modern, and it would be a splendid thing if a touring collection were sent here. Everybody wants to see Sir Luke Fildes' "The Doctor," which hangs in almost every doctor's office, but beyond a few of the most popular works British artists are mere names. The National Gallery contains many masterpieces by French, Flemish, Italian and Dutch painters, and presumably any travelling exhibit would also include some of them.

Parliament would have to pass a special Act, as once a picture is hung in the National Gallery it is not supposed to be moved. In the present state of what Joseph Chamberlain called "thinking Imperially" there should be little opposition to such a proposal, even although the insurance would have to be enormous.

Any peripatetic exhibition should undoubtedly include, if it can be arranged, a selection from the Tate Gallery which is exclusively composed of the works of British painters who are, or were living, at the time their works were selected. It is there that "The Doctor" hangs, and some of the more splendid canvases which British people throughout the world would be thrilled to see.

Having regard to the fact that foreign countries have sent art exhibits of fabulous value to London in recent years the British government should not be slow to act.—St. Thomas Times-Miner.

### Rural Population Small

#### Canada Has Only 31.7 Per Cent Living On Farms

Of the 10,362,833 persons who form the population of Canada, exclusive of the Yukon and the Northwest Territories only 3,299,597 or 31.7 per cent live on farms. The rural population of Canada at the last census numbered 4,792,135 of which 3,299,597 or 67.2 per cent live on farms and were presumably engaged in farming. The remaining number 1,502,628 or 32.8 per cent represented the rural population which did not live on farms—usually in small hamlets or other unincorporated areas.

Associated with Mr. McCurdy in the construction of the gasoline motor-powered "Silver Dart" were Dr. Alexander Graham Bell, F. W. Baldwin, grandson of Hon. Robert Baldwin, Premier of Canada before Confederation; Glen R. Curtis, Ian C. Morgan, president, International-Airline Society, said in his review of the circumstances under which the flight was undertaken, Mr. McCurdy is a graduate in engineering of the University of Toronto in 1906.

Added interest to the event was the fact that Mr. McCurdy, a Baddeck man, had drawn the plans, so that the machine which made the first flight in Canada primarily was a Canadian product. In honor of the occasion, the Baddeck Town Council presented an engraved testimonial of esteem to Dr. Bell and Mr. McCurdy, including these in their historical records.

#### Canada Commemorates First Airplane Flight

#### Plans Used For Machine Were Drawn By Canadian

The first airplane flight in Canada on February 23, 1909, exactly 24 years ago was recently commemorated in the International Airmail Society releasing a special cachet featuring a Maple Leaf, with the scene of the episode, Baddeck, Nova Scotia, inserted. The name of the airplane "Silver Dart," which was piloted by J. A. D. McCurdy, who now is president of the Montreal Aircraft Industries, is printed in large type. The distance then flown was one-half a mile with no mishaps reported in landing.

Associated with Mr. McCurdy in the construction of the gasoline motor-powered "Silver Dart" were Dr. Alexander Graham Bell, F. W. Baldwin, grandson of Hon. Robert Baldwin, Premier of Canada before Confederation; Glen R. Curtis, Ian C. Morgan, president, International-Airline Society, said in his review of the circumstances under which the flight was undertaken, Mr. McCurdy is a graduate in engineering of the University of Toronto in 1906.

Added interest to the event was the fact that Mr. McCurdy, a Baddeck man, had drawn the plans, so that the machine which made the first flight in Canada primarily was a Canadian product. In honor of the occasion, the Baddeck Town Council presented an engraved testimonial of esteem to Dr. Bell and Mr. McCurdy, including these in their historical records.

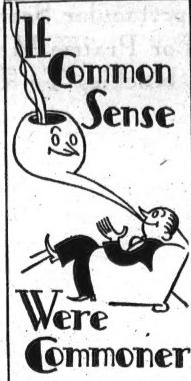

### Preparing For Trip

#### Commander Byrd Going To South Polar Regions In September

An antarctic expedition led by Commander Richard Byrd is to go into the South Polar regions in September. Preparations have already started at Dunedin, New Zealand, to collect supplies for the trip. Among the items are 500 tons of coal, one or two aeroplanes with accessories, approximately 15,000 gallons of gasoline, and about forty tons of food, from thirty to fifty tons of dog food and about fifty tons of other supplies.

### More Men Employed

Men predominate in the British Civil Service, of which statistics have just been issued. Of total of 317,388 in the Service, 288,925 are men and 78,464 are women. These figures also include 157,794 ex-service men, of whom 47,838 are classified as dis-

Come to think of it, men, this thing we call common sense isn't so very common. If it were, every pipe smoker would apply common sense to the selection of his pipe tobacco.

That would mean Ogden's Cut Plug of course. For if ever a tobacco was made for pipes it's Ogden's. And your pipe will prove it. It will talk to you in Ogden language. With Ogden's Cut Plug in the bowl you'll forget there ever were such words as "bite" or "burn" in tobacco talk.

## U. S. WILL SEEK WAY TO REDUCE WHEAT OUTPUT

Washington.—The United States administration revealed itself recently as already considering overtures with other nations looking to mass action against agricultural surpluses and tariff barriers.

As proof of its sincerity in this move for economic betterment, the Roosevelt government will seek from congress broad powers to control farm production and has made clear it stands ready to practice what it preaches on cutting high tariffs if other countries will follow suit.

It was disclosed that already the project of limiting wheat production to the level of world consumption by agreement among the great grain-producing nations, Canada among them, has been discussed informally with representatives of other governments.

This is believed to have entered the recent discussion. President Franklin D. Roosevelt had at New York with Hon. William D. Herridge, the Canadian minister.

The president expects that in response to a special farm relief message he will send to congress soon, the present special session of congress will give the executive power to reduce the output of agricultural products in which burdensome surpluses have been holding down the price. The broad authority to be asked is expected to include means for the government to lease from the farmer a part of his acreage to take it out of actual production.

With a firm hand regulating the flow of America's exportable farm products, it is felt the president would be able to take a leading part in getting producing nations to agree on a fixed rate of exportation estimated to meet the needs of the world and not to pile up surpluses.

The unofficial discussions engaged in thus far have involved a single product—wheat—and were understood to have taken place with the Canadian Government.

Through diplomatic channels, further conversations are to be held with the major wheat-producing nations, including Australia and Argentina, with a likelihood the matter will be definitely decided at the international economic conference in London some time this summer.

In the past, as recently as a year ago last summer, unavailing efforts have been made to reach just such an agreement on international control of wheat production. A factor preventing definite results was the inability of the American government to control the domestic output.

All producing countries agreed co-operative action to limit production would end the era of subnormal prices.

Through the same diplomatic channels in advance of the economic conference, high officials of the state department said the United States will seek the reciprocal agreements for lower tariffs.

This strongly worded statement on which the official decided to be directly quoted, gave plain indications of the emphatic attitude of the administration toward the question of tariff barriers.

The administration's stand was emphasized by Secretary Roper, of the Commerce Department, in an address asserting the American people are "tired of a policy that has antagonized every other nation in the world."

### Empire Materials

Ottawa, Ont.—Empire materials are to be used on government contracts in future. This applies, not only to contracts let by the departments of government but also to the Canadian National Railways and government boards and commissions.

### Heriot Wars France

Paris, France.—Former Premier Edouard Herriot has finally warned France that it is to her "essential interest" to pay her three-months overdue debt to United States as soon as possible in view of changed conditions in central Europe.

## Disastrous Fire In Hull Match Factory

**Five Girls Dead and Many Others Seriously Injured**

Hull, Que.—Five girls were burned to death here when fire gutted the Canada Match factory, following an explosion.

Firemen poked through the smoking ruins, searching for two who are missing. Twenty-one people lie on hospital beds, seared and charred by the blast and flames.

Racing up from a mixing-tank, the explosion caught 15 girls in the vicinity with staggering suddenness. Little chance for escape was offered. Fire followed immediately on the explosion and in a few minutes the building was a mass of flames. So quick was the whole thing, however, that little could be done. Such injured as could be rescued were taken to the hospital.

The factory was located north of Hull, a block from that section of the Chelsea road known as St. Joseph Boulevard. No buildings were located near it. The fire started near the main entrance of the factory, which was of brick construction and with many windows. The only explanation why so many lives were lost was that the heavy explosion carried the fire to all parts of the structure, and cut off the entrances.

The factory employed about 25 girls, although in normal times double that number would have been at work.

All the girls were residents of the immediate locality and in their teens or early 20s. The bodies taken from the ruins were in the main so badly mangled that it was impossible to identify them.

It was felt that at least three more employees were unaccounted for, and some estimates placed the figure as high as eight. Those who were rushed to hospitals by private motor cars and ambulances and an accurate check on their number or the extent of their injuries could not be made immediately.

## Registration Of Voters

### Compulsory Voting Law For Canada May Be Introduced

Ottawa, Ont.—Indications were seen in the senate debate that recommendations may issue from that chamber for a system of compulsory registration of voters and compulsory voting, for the electors of Canada, and severe penalties involving imprisonment for impersonation at the polls. Right Hon. Arthur Meighen, government leader; Gen. A. D. MacRae, Vancouver; Hon. W. A. Buchanan, Lethbridge; and Hon. C. C. Ballantyne, Montreal, took part in the adjourned debate.

Senator Meighen observed that in all the speeches that have been made on this subject, since it was introduced a week ago by Senator W. E. Foster, there had been agreement that election costs were too high, and that some change should be made, preferably a system of compulsory registration and voting. He believed a committee of the senate might do some valuable work along this line.

## Market Recovery

### Prices Of Securities Advance On New York Stock Exchange

New York.—One of the most brilliant recoveries in security prices in the history of the New York Stock Exchange attested the restoration of financial confidence which has swept the United States with the reopening of thousands of sound banks.

Shares surged up \$2 to \$16 in scores of favorite issues. The advance in bonds was just as striking. Many issues were swept up \$10 to more than \$50 per bond to \$1,000 par value.

It was in the decisive measures taken in Washington, rather than in news from business and industry that financial quarters found new encouragement.

### Bridge Made Safe

Calgary, Alberta.—Twelve men with picks and shovels removed the ice and sand gravel on the approach to the Arrowwood Creek Bridge, 20 miles east of High River, Alberta, where three men in 48 hours lost their lives in automobile accidents.

## ENVOY TO BRITAIN

Judge Robert Bingham, prominent publisher of Louisville, whose name has been submitted to Great Britain by the United States for approval as United States Ambassador to the Court of St. James. Judge Bingham was Mayor of Louisville in 1970, Chancellor of Jefferson Circuit Court in 1911, and is trustee of Berea College and Centre College of Danville, Ky.

## A Voluntary Exile

### Prof. Einstein Will Not Return To Germany Under Present Conditions

New York.—Professor Albert Einstein announced himself as a voluntary exile for the present from Germany; when he arrived here from California. How long he will remain is not known. But he "will not set foot on German soil as long as present conditions are as present."

He is sailing for Antwerp, to decide his future course.

"I am no Nationalist," he said at a dinner in his honor attended by some of the foremost American scientists, and leaders in finance, education, art and letters.

Without mentioning Germany he referred to "the prevailing disease of an exaggerated nationalism," and said:

"This nationalism is a grave danger for the entire western civilization, which at one time had its origin in Greece. Behind it are powers internal to life. To combat it is incessantly the duty of every well-intentioned and perceiving being of our time."

He spoke of Jewish persecution in "eastern Europe," and said "it is not easy to say where the western boundaries of this eastern Europe are to be sought."

## AS JAPAN "WALKED OUT" OF THE LEAGUE

This dramatic scene had its brief moment in the world spotlight recently, and its consequences gave the war-weary nations a bad scare. Led by their leader, Youseki Matsukura (right), Japan's delegation to the League of Nations at Geneva is shown as it "walked out" on that august body following the League's vote of censure, laying the blame for the Far Eastern trouble on Nippon.

## Senate Endorses Bill

### Favors Sweepstakes For Charity If Any Province Desires Them

Ottawa, Ont.—Canada's senate endorsed the principle of sweepstakes for charity purposes if any province desires them, when it passed the second reading of Senator McCreary's bill by a vote of 37 to 19.

Opposition members moved that the bill be referred to the Senate committee on private bills. The impression is that with the substantial majority it received on the second reading, the bill will complete its course in the senate and be sent on to the commons, where an interesting battle may be expected.

A bill has been placed before commons providing that informers seeking money won by sweepstakes winners must first obtain consent of provincial attorney-general before taking action.

London, Ont.—Unanimous votes were recorded in favor of sweepstakes by eight of 10 Canadian legion branches in the London district, it was stated at legion headquarters here. The other two branches had not filed a report.

## Unemployment Insurance

### Saskatchewan Legislature In Favor Of Federal System

Regina, Sask.—Unanimously, the Saskatchewan legislature went on record in favor of the early creation of a national system of unemployment insurance.

George Spence (Lib., Maple Creek), was the mover of a resolution calling in general terms, for provincial support to any efforts of the federal government to establish unemployment insurance.

Hon. J. F. Bryant, Minister of Public Works, moved an amendment, mentioning specifically a national system of unemployment insurance, the creation of a national commission to devise it, and urging that the government should at once call all constitutional rights in the matter to the federal government.

Mr. Bryant's amendment was accepted by Mr. Spence in preference to his original motion, and the House stood it without division.

### United States Buys Britain

Washington.—The United States has disclosed its intention to support Great Britain in a move looking towards international action against nations waging war—undeclared or otherwise—by enforcing an arms embargo on arms shipments.

### Cost Of Commission

Ottawa, Ont.—The Duff commission cost Canada \$62,338, according to an answer given in the House of Commons to a question asked by Hon. Ian Mackenzie (Liberal, Vancouver Centre).

## NO FURTHER BURDENS ON THE B.C. TAXPAYERS

Victoria, B.C.—Not one dollar of new taxation will be imposed on the average taxpayer of British Columbia, said Hon. J. W. Jones, Minister of Finance, in his budget speech in the legislature, but on personal incomes over \$5,000 a year, the government will levy a new graduated surtax progressive from one per cent on the first \$2,500 to 18 per cent on incomes in excess of \$50,000. This will be additional to all present levies and is estimated to raise \$360,000.

Succession duties will be raised 25 per cent, which, with further detailed adjustments, will bring a new revenue of \$315,000. The school tax on lands outside school districts is reduced from five to two mills.

The government will spend \$22,729,595 in the next fiscal year as against \$24,693,671 in the year now ending. A reduction of \$1,964,075, or a total cut in departmental expenditures in the last two years of \$4,240,518.

Government revenues on estimates "pared to the bone" with "padding" removed, are fixed at \$20,497,591. But the expenditure total contains a provision of \$2,421,620 to be set aside in sinking funds. Thus, while the total revenue and expenditure estimates show a deficit of \$2,322,002, in actual fact there should be no deficit at all, Mr. Jones said. The sinking fund provisions may not be made in full during the next year, but the province will collect more money than it spends, the minister said.

## Would Maintain Neutrality

### Winston Churchill Urges Britain To Avoid European Alliances

London, Eng.—Winston Churchill, former Conservative Chancellor of the Exchequer, urged before the House of Commons that Britain keep herself free from European entanglements.

Mr. Churchill, who was speaking in debate on the air estimates, said that to keep out of commitments on the continent the United Kingdom must be strong enough to maintain her neutrality and must, therefore, carry out her full programme of air defence.

Sir Philip Sassoon, under-secretary for air, presenting the estimates, told the House the Royal Air Force had effected economies with some anxiety as ten regular squadrons were still required to complete the "modest" programme approved as far back as 1923. In terms of first line strength, he added, the Royal Air Force stood today fifth in the list of air powers, while at the end of the Great War it claimed first place.

## Victim Of Dread Disease

### Devoted Wife Accompanies Husband To Leper Colony

Toronto, Ont.—Unflinchingly, a devoted wife will brave the isolation of the New Brunswick leper colony on Tracadie Island in company with her diseased husband, it was revealed here. Accompanied by his wife and a nurse, the leper is travelling to the colony aboard a special colonist car placed between locomotive and baggage car.

Victim of the dread disease apparently contracted some years ago in South America, the unfortunate man has been identified as a former well-known Toronto athlete and graduate of the University of Toronto. He and his wife learned the nature of his malady about Christmas time. The victim is of latter middle age and his wife about 50.

### Official Was In Danger

Winnipeg, Man.—"I was afraid he would not leave his office alive if he refused to sign his resignation," Constable Alcock, of the Royal Canadian Mounted Police, testified before Mr. Justice A. K. Dysart, at the trial of 14 men of the Arbogast, Man., district on charges of rioting and unlawful assembly in connection with a disturbance last November 29.

each subsequent insertion.

**Medical Services.**

That adequate medical services for all the people of Alberta can be secured only thru the operation of a contributory health insurance scheme, is stated in the progress report of the legislative committee on health services. The committee's report, dealing with ultimate provision of an ideal scheme for medical services, says any plan of a more "local" nature should be readily adaptable to a more general system if such should become dominion or provincial in its application.

Enabling legislation by which municipal districts or parts thereof may organise for provision of medical and allied services also should be utilised, says the report.

Information at hand as yet does not enable it to make a final report, which is regretted by the Commission, of which Hon George Hoadley, Minister of Health, is the chairman.

**Protecting the Home-owners**

Immediate action to relieve the resident farmer or farm owner and the urban home owner not only of the possibility of legal proceedings that might dispossess him of his home, but also of the strain and anxiety which generally precedes such action, was taken in the Alberta Legislature last week, by way of an emergency measure introduced by Attorney-General Lymburner.

The bill provides that no action may be commenced by any creditor against a home-owner without a permit from the director of the debt adjustment act. The bill will have effect until such time as the new debt adjustment legislation becomes law.

The bill applies to resident farmers or farmers who have owned farm homes and are dependent upon returns from such property; and also to the home-owner or man who is residing on a property which he is purchasing as a home under agreement.

With respect to the farm owner, the bill applies to any kind of claim which may be against him, and in connection with which proceedings might be taken which would incur costs against his land. With respect to the urban home owner, the bill relates obviously to actions which might be threatened against the land which he occupies as a home. All home owners as above described are, therefore, by this legislation, relieved of any anxiety with respect to holding their present homes.

It is clearly explained that, of course, this Act only applies to past due indebtedness and not to new debts, as it is not felt reasonable that any one should be protected against liabilities deliberately incurred in the light of present day conditions.

**Would You Like to Know—**

(by Val M. Kotcherofski.)

That Judas Iscariot betrayed his Master Jesus Christ for "thirty pieces of silver"—about \$12.75 in Canadian currency. That a kangaroo's method of travel is by a series of great leaps—10 to 15 feet, or more. That Jupiter is the largest of the planets in our solar system, and is, according to astronomers, 1300 times the size of this world. Jupiter has a diameter of nearly 90,000 miles at its equator, and the diameter from pole to pole is approximately 84,000 miles.

**Sparks Says.**

Out at the Pas they have a flying bishop—which goes to show once more that you can't keep a good man down.

Ho-hum! I just got finished paying for your car license, when up bobs your income tax return.

**Co-operative Committee's Bulletin.**

All U.F.A. Locals are urged to canvass the possibility of pooling their orders for fuel and lubricants and greases, formaldehyde, gopher poison, posts, grass seeds, etc. Very real savings can thus be made directly to those participating, while the tendency to lower the price level of supplies brings added benefits. The experience of U.F.A. Locals which are making use of the facilities provided by the U.F.A. Co-operative Committee is that co-operative buying of bulk commodities is an effective means of building up membership.

**Organising Edmonton District**

Using Edmonton as a center, and covering 12 points within a radius of 50 miles or so, Messrs Priestly, MacLeod and Church of the U.F.A. Co-operative Committee, together with Messrs Bevington, Young and Moyer, have arranged a series of meetings and conferences with groups of members of the U.F.A. in the interests primarily of co-operative buying. They have inspected the new plant of the Great West Distributors, Edmonton. In the mornings they are sitting with the Agricultural committee of the Legislature.

**CHILD PROTECTION.**

For \$1.00 per year the General Accident Assurance Company of Canada will insure a school child for any out of pocket expenses in connection with an accident whether it be Hospital, Nurse, X-Ray, Dentist or Doctor. Bill we will pay them up to \$100.00.

Here is the application—

I hereby make application to THE GENERAL ACCIDENT INSURANCE COMPANY OF CANADA for the undersigned to be included in the School Group Policy, the inclusion to be based upon the following statement of facts which I declare to be true and correct:—

## EXCESS FAT RUINING HER HEALTH

### Better After Losing 14 lbs.

There are a number of bodily ailments that are apt to arise in overweight men and women, and if excess fat is reduced in the right way, very often improved health follows—as it did with this woman:

"I was losing a great deal of fat that seemed to never stop me breathing, especially when I knelt down to do any housework, or was walking up a hill. I had simply had to stop for my breath for about 20 minutes. But now that has all gone, thanks to Kruschen. I have lost 14 lbs. in weight, and am able to get up and about, and feel all day and夜, and feel tired. I feel so much better, and am so pleased to have lost some of the fat that was steadily gaining ground with me, and ruining my general health."—A. K.

There are six vital mineral salts in Kruschen. These salts combat the cause of fat by assisting the internal organs to perform their functions properly. Every one of the day's waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue. Unlike ordinary appetite-suppressants, Kruschen controls its action to a single part of the system. Its tonic effects extend to every organ, gland, nerve and vein.

### FREE TRIAL OFFER

If you have never tried Kruschen—try it now. Our expenses are have distributed a great many "GIANT" samples which it is easy for you to prove our claims for yourself. Ask for a free sample and we'll send you a package.

Three packets of regular size bottles together with a separate trial bottle—sufficient for about one month's use. If you are not satisfied with the test, and they not entirely convinced that Kruschen does everything we claim it to do, return the unused portion and we'll give you a full refund.

Your druggist is authorized to return you Kruschen if you are not satisfied.

You have tried Kruschen first, at other expense, and are not satisfied? Write us.

J. Griffith Hughes, Ltd., Manufacturer, Eng. & Importer, Imparters: McMillan Bros., Ltd., Toronto.

ides, I'll get my pay out of it in the long run. Look at the publicity value, Alan, if we pull a stunt like that: With all the headline advertising I'd get..."

"But supposing your machine gets wrecked down north somewhere? It'd be a total loss. I couldn't pay you back for a long—"

"Usually when a fellow's plane is a total wreck, he doesn't worry much about the loss. All he cares about is a nice headstone."

"But look here now, and get this straight. We haven't any right to pull a trick like this, Buzzard. We're stepping outside the law. We're violating several hard and fast statutes. I happen to know."

Buzzard grew impatient. "Suppose we get down to essentials. You said you wanted to leave as soon as you could. Then let's talk sense. How about gas? This crate of mine isn't one of these transatlantic planes. I'll do about seven hundred miles in a pinch, and then it stops and sets down. I'll have to get a pack-chute for a plane. A decent one'll cost three hundred. I've got to put on a new propeller; that toothpick on the old crate now is about ready to quit. A new prop costs like sixty. Then we need navigating instruments on a long trip like this. They came high. I could use fifteen hundred dollars."

Alan paled a little, but he said doggedly: "I'll raise it. I'll raise it somehow."

Buzzard was thoughtful for a moment. "Maybe," he said finally, "you won't have to raise it. I'll tell you what, Alan; you give me two hundred, and I'll try to manage the rest of it. You'll need money for your outfit and we'll have to keep some for operating expenses."

Alan nodded, though he did wonder what Buzzard meant by that word "management."

They went back to the Chateau and waited. At three o'clock the wire came from Victoria:

"The five hundred is accompanying this letter to let you know if need more looking forward to seeing you and presumably meeting Mrs. Baker."

"S. G. V. STEELE."

Alan was grateful for the desperately needed money; grateful for the personal warmth of Colonel Steele's message. But he felt that he had sold his freedom now and indented himself.

Stubbornly he forced his mind away from the heavy cost and regrets that tore at him. Putting aside three hundred dollars for operating expenses, he gave Buzzard two hundred and kept two hundred for himself. After arranging to meet out at the field that night, they separated.

At a pawn shop Alan stopped and bought a pair of binoculars. Powerful x-12's of a costly make, they put a sad dent in his roll. Farther along he managed to purchase two heavy automatics, slipping the proprietor ten dollars extra in lieu of a permit.

There came emergency food for the trip and the flying togs Buzzard had advised him to get.

He still lacked a folding canoe, a number of small items, and one last piece of equipment—the most vital of all his adventure. Down to fifteen dollars, he went into another pawn shop and soaked his expensive watch and a diamond brooch of his mother's, making the owner promise to hold them for six months. With a hundred and seventy-five in his pocket, and a second-hand Ingersoll which the old gentleman had kindly given him, he walked out, breathing easier.

As he passed a fashion shop, his eyes happened to be caught by an inevitable ceiling fixture, a broad sash belt hand-made in old Quebec. Thinking of the worn and faded one Joyce owned, he stood admiring this.

"How much are you getting out of this? Nothing. Good! I'll take the same."

"But it's my affair, my quarrel."

"Then I'll horn in on it. And be-

auty, imagining how rapturous Joyce would be if she had it. She longed to wear it properly, with a saucy grace that only the metisse girls could match; for the wearing of the bright girdle was an ancient vogue a custom rapidly dying out. Forty precious dollars . . . but worth the price if she'd like it, a gift from him."

With almost his last dollar he went in and bought the girdle.

Later, through the gathering twilight, he walked to the armory. Two companies were practicing there that evening. By pretending to be a new Edmonton citizen anxious to learn how to drill and perhaps to join the militia, he not only got inside but was shown all around the place by a lieutenant impressed by his stalwart, powerful physique.

The Lieutenant went back to his duties, the companies went on drilling, the privileged spectators began trickling homeward. When the armory was closed at eleven, when the gaunt big building was locked up and deserted, it was Alan Baker who rose up, like a thief in the night, out of a big bass drum case in a corner on the ground floor.

Not daring to strike a light, he groped across the parade floor to the room where the Lieutenant had shown him the machine guns and explained their use—to him, commander of a machine gun platoon through a dozen major battles! He felt around among various types till he laid hands on an old friend, the Browning air-cooled, A-10. He found plenty of ammunition, a better tripod, and lastly a tarpaulin to wrap the whole outfit. If he started down an Edmonton street with a machine gun over his shoulder he was not likely to get far.

Gathering all his things at the Chateau, he whipped on out to the rendezvous arranged with his newfound partner.

Buzzard had put in some busy hours. He had filled up on gas and oil; had attended to several repairs and replacements; had acquired a packchute, new propeller and half a dozen costly flying instruments.

With a couple of mechanics whom he had awakened at an all-night garage, he was busily putting on the new prop.

Vaguely suspicious, Alan took him aside and asked quietly:

"Say, Buzzard, how did you get all this equipment? You've got more than a thousand dollars worth here, and you only had two hundred . . ."

"I borrowed that stuff temporarily. There's several government planes here, and they had extra equipment."

"Borrowed it? Temporarily?"

"Well, stole it."

"Stole it? Government property?

Good Lord, man! That's a penitentiary offense. The authorities will

make sure catch on to who took it."

"Yes, I expect they will. At least the night watchman'll know. I invested five dollars in liquor for him; and he's sleeping it off over that hanger. He'll put them next to us."

Buzzard's voice became serious. "But Alan, I couldn't get it any other way. We still had to have it, or give up our trip."

"Yes, we had to have it." Alan nodded reluctantly. "I guess you did right, Buzzard." But it staggered him to realize that he and his partner were criminals now in the eyes of the law. Their motives would be no excuse. They faced a prison term if caught. And their capture was inevitable; soon or late they would have to show up somewhere.

He could not bring himself to retrace Buzzard. He himself had stolen a machine gun, though he had covered his tracks pretty well; and Buzzard after all had done this for his sake. And he felt that this theft was justified, if ever that could be. With no chance of personal gain, at heavy cost of their own hard-earned dollars and at risk of their very lives, he and Buzzard were flinging themselves against a pack of murderous criminals.

He said: "We'd better be getting away from Edmonton forthwith. At daylight there'll be people here on the field. It'll be our fins if we're not gone."

They donned their flying togs. Buzzard showed Alan how to put on his pack-chute, how to jump clear in case of disaster and jerk the rip-cord.

## HEADACHE Here's Quick Relief:

Aspirin brings you immediate relief. It acts before you can feel any effect at all from the slower forms of relief.

Do not hesitate to take Aspirin tablets because of this speed. Their quick action is due to the fact they dissolve immediately. They are perfectly safe. They do not depress the heart.

That's the beauty of a remedy like Aspirin. Anyone can take it, as often as there is any need of its comfort. In

sufficient quantity to get complete relief. You could take Aspirin every day in the year without ill effects.

When you want relief from headache, colds, neuralgia, or neuralgia, periodic pains, etc., stick to Aspirin. You know what it will do, and you know what you are taking.

The new reduced price on bottles of 100 tablets leaves no reason for experimenting with any substitute for relieving pain. Insist on Aspirin.

## ASPIRIN TRADE-MARK REG. has SPEED!

### Most Famous Spy-Glass

One Owned By Lord Nelson Recently Sold in London

An auction sale was held in the West-end of London, England, recently and a spy-glass was put up for sale. It brought the equivalent of \$7,700 per value. It was not nearly as good as any modern spy-glass costing a few dollars would be, nor was it encrusted with diamonds. But it is probably the most famous of its kind in the world.

It was the glass that Nelson held up to his blind eye and said, quite truthfully, that he did not see an overwhelming armada bearing down upon his fleet at Trafalgar.

At the same \$800 was paid for the silver watch presented to Midshipman Pollard who killed the sharpshooter who mortally wounded the British Admiral.

"Do you know where you are?" demanded the tourist's wife.

"No," he admitted. "I'm as lost as the average American is when he starts on the third verse of the national anthem."

### Little Helps For This Week

"Then shall we know, if we follow to know the Lord!"—Hosea 6:3.

And as the path of duty is made plain, May grace be given that I may walk therein.

Not in the hiring for his selfish gain,

With backward glances and reluctant tread,

Making a merit of his coward dread, But a moral in the light around me thrown,

Walking as one to pleasant service led:

Doing God's will as if it were my own,

Yet trusting not in mine, but in His strength alone.

—J. G. Whittier.

It is by doing our duty that we learn to do it. So long as men dispute whether or no a thing is their duty, they never get nearer. Let them set ever so weakly about doing it, and the face of things alters. They find in themselves strength which they knew not of. Difficulties, which it seemed to them they could not get over, disappear. That which is called considering what is our duty in a particular case, is very often nothing but endeavoring to explain it away.—Bishop Butler.

### Prince Conducts Band

The Prince of Wales, using a drumstick for a baton, conducted the band in a lively fox-trot at the St. David's Day dance given by the 1st Battalion of the Welsh Guards, of which he is the Colonel. The Prince's rending was repeatedly encored until he laughingly told the dancers that conducting was more strenuous than dancing. Later he acted as master of ceremonies, selecting the tunes.

### When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teen need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

For BETTER COOKING and LESS WORK—  
*Use CANAPAR*  

### Cookery Parchment

Cook fish, meat and vegetables in Canapar. You will be delighted with their new flavor—and no odors escape. At dealers or write—

THE CANADA STARCH CO. LIMITED, MONTREAL

## Hockey Fans Delayed on Trip from the Arena.

Mr John C Miller took in a party of friends, last week, to witness the Eskimo-Vancouver championship hockey contest, and the party had quite an experience before returning. The fans travelled in the Royal bus and on making a stop on the Boulevard for a passenger, the engine stalled. John got out to cranker up, leaving the choke on. When the engine began to rumble, the crank stuck, and began revolving at quite a speed. Presently a piece of the crank broke off, and in its flight missed the cranks' headpiece by a narrow margin. Two more pieces flew off, and got lost in space. The fourth and last segment, leaving the shaft with a centrifugal impulse, penetrated the front of the radiator, releasing the water therein contained.

The damaged car was taken to a nearby garage, where

## Saturday Afternoon Sales.

Saturday afternoon last the biggest crowd of shoppers and visitors were noticed in Stony Plain what has been seen here in quite a long while. The big horse sale no doubt attracted some. When the sale of horses had been finished, various articles were put under the hammer, and sold. These Saturday sales will probably be held here on every second Saturday.

In the sale in the horse section the bidding was keen, the best team fetching \$142. Horses are in demand locally, giving evidence that farmers are going back to horses to do their farm work. While the tax on gasoline is about to be increased, one farmer remarked that "the Government has not, as yet, put a tax on oats."

several welding operators began work on it. The repairs were finally completed, and the party returned to Stony at six bells.

## Stony Plain and District

Mrs J Morrison is visiting friends at Saskatoon.

Mr Harvey Umbach arrived in Stony Plain on Saturday, from Peace River district.

Mrs M McKinlay had recovered sufficiently from her recent operation to be taken from an Edmonton hospital on Saturday last, and is now convalescing at the home of Mr and Mrs Botsford, Edmonton.

Mrs Davies left on Monday's flier on the C.N. Ry., on a trip to the East.

Owing to there being several other attractions that afternoon, the Tally-ho club's sleighing party billed for last Sunday afternoon, had to be postponed.

At the meeting on Sunday of the Varsity Musical Club, Mr Manly Benson Donaldson, was re-elected secretary of the organisation.

At the bridge party given Friday evening at the home of Mr and Mrs Clarke, Mr and Mrs A E Michael won the prize given the couple having the highest score; and Mr Michael won the gents' first prize. Mrs J P Gannon won lady's first prize.

Messrs Bill and Frank Pailler left this week for Vancouver.

Tomorrow, the 24th, Mrs B Miller is holding a sale of stock and farm machinery at her farm in the Blueberry district. Mrs Miller has discontinued farming, and everything will be sold, regardless of price.

Messrs L Kowensky and H Oppertshauer were on this week's panel for jury duty, and went to Edmonton Monday, to report. Mr McCullough is a witness in an important case.

Magistrate E Williams had but a short session of his Court here on Monday, a few small debt cases engaging his attention. It is understood that probably after Monday next His Honor will discontinue his trips to Stony Plain, as the Attorney general's department has deemed it advisable so to do, as a matter of economy.

BUTTER AND EGGS WANTED at the Royal Cafè.

## Medals for Chauffeurs.

In presenting ninety-two chauffeurs with bronze medallions in recognition of the fact that they drove for twelve months without a single accident, the Province of Quebec Safety League is doing something that may well prove a valuable incentive to others, says an exchange. The driver who can go thru a whole year without any kind of accident proves that he is careful, and he observes the traffic laws, and that he is considerate of pedestrians.

## Spruce Grove News

Mrs W J Connolly held a very successful bridge party last Tuesday evening. Lady members of the Stony Plain Curling club were in attendance.

Patrons of the hotel restaurant expect it will re-open shortly.

Mr J H McLaughlin has opened the spring campaign for that well-known fertilizer, Elephant Brand, and, despite the alleged depression, reports that a number of farmers of this and nearby districts, will try this fertilizer out on this year's crops.

The people of the Grove and district were given a fine treat this week, along the entertainment line, when the dramatic club of the Y. P. S. of MacDougal United church, Edmonton, gave a series of musical and vocal numbers and staged their popular play "The Bishop's Candlesticks," in which the acting of Mr Percy Bolton, a student from St Stephen's College, shows up to such good effect.

Reeve Th Wudel is advertising for an auditor for the Spruce Grove Municipal District No. 519. The salary to be \$125; a chartered accountant preferred. Apply The Reeve, Spruce Grove.

## Farmers Throwing Out Telephones.

No wonder the telephone department is in the red. From Leduc to Calmar and from Calmar to Thorburn the farmers have thrown out their telephones and the Telfordville rural system is a huge joke and why? Simply because the fee of \$25 is altogether outrageous. A flat rate of \$5 per year is all the service is worth even the business phone rate of small towns is out of all proportion. At \$5 per year every farmer would connect up on the system and far better a small five than a big nothing. Thorburn and distior demand immediate action on this matter at once. —Ledu Representative.

## The Sun's Calendar.

- MARCH—  
19—Hockey game at 3 p.m.  
24—Whist drive and dance, Lucknow Schoolhouse.  
25—Stony Plain U.F.A. Local to meet.  
29—Address on Farm Problems at Moose Hall.

- APRIL—  
8—Auction Sale in Stony Plain  
14—Good Friday.  
17—Dance, Moose Hall.

## Church Services.

Services in St Philip's Church next Sunday, 9:30 a.m.  
Service at Rosenthal Lutheran church next Sunday, is at 10:45 a.m.

German Lutheran services will be held in Stony Plain next Sunday at 2:30 p.m.

United Church service every Sunday Eve at 7:30.  
During the Lenten season services are being held at 7:30 every Wednesday evening at St Matthew's Lutheran Church, by Pastor Eberhardt.

## Here and There

Coal from Alberta mines for 1932 totalled 4,870,039 tons, an increase of 200,000 tons over 1931.

A cod with a silver spoon engraved "P. R." in its stomach was caught in the fish float, Port Alberni, B.C. The spoon probably fell overboard from one of the company's coastal liners.

A tip that formerly took two days over rough trails is now done in 10 hours and nine minutes when fish from Northern Manitoba lakes are transported to rail head for distribution all over Canada and the United States.

One of the largest sailings of the cruise season was recorded recently when the Empress of Australia sailed from New York on a Mediterranean cruise with a list of 400 passengers. Many so-called prominent Canadians were on board.

The National Sea Flea Hockey Club's tour of Europe overcame the difficulties and sailed recently from Halifax by Canadian Pacific liner Montcalm. They are the Allan Cup holders and will play in London, Paris, Berlin and Prague.

Twenty-six year old veteran of the Canadian Rockies, British Columbia and Alaska ranks as the Princess Royal, once the pride of the Canadian Pacific's B.C. Coast Steamship fleet, has been sold out of the hands of the Island Tug and Barge Company.

Edmonton's resumptive of the Carnaval Throne, the Edmonton Huskers' triple victory in the ladies' hockey series, and spectacular ski jumping by youngsters at Lethbridge were the outstanding features of the Banff Winter Carnaval recently concluded. Miss Violet Davis, of Edmonton, was crowned the 1934 Queen.

Canada's fifth annual mid-winter golf tournament, Old Baldy Golf Links for the E. W. Beatty Trophy, started February 21 with an entry list of 75 men and 65 women. They came from Eastern, Scotland, Ontario, the Prairie Provinces.

Fish caught in the sea fisheries of Canada in 1932 totalled 711,917,800 pounds valued at over \$11,000,000. Of the total catch 52,631,800 pounds were harvested for 327,631,800 pounds; Nova Scotia, 194,783,800 pounds; New Brunswick, 58,554,800 pounds; Quebec, 67,163,300 pounds and Prince Edward Island, 33,738,000 pounds.

The Plaza Hotel, Montreal, owner of the 100-year-old hotel, legal and social life of the Province of Quebec, has been given a further lease of life under Canadian Pacific ownership. October 1. It was to have closed its doors permanently January 31, but many and powerful representations brought about the respite.

A record-breaking ride through the Rockies in a three-car open-coupled four-hour run from the regular trans-continental train schedule in what Canadian Pacific Railway officials believe to be the shortest time ever made for the 605 miles from Vancouver to Field recently. The run, made for the Colbourne-Jones Company, "True to be Good," started from home as the regular train had left Vancouver and caught up with it at Field.

# Elephant Brand FERTILIZER.

Prices for 1933 are as follows:

**AMMONIUM PHOSPHATE,**

**\$58.30 per ton, cash, off car.**

**TRIPLE SUPER PHOSPHATE,**

**\$45.00 per ton, cash, off car.**

Time prices slightly higher.

Cost per acre runs from 70c.—\$1.20.

Fertilizer attachments are now handled by the I.H.C. Massey Harris, John Deere, and Cockshutt for the newer models of their own drills. The Consolidated Mining & Smelting Co. make attachments for all drills, new or old, at \$3.50 per run, less 5 per cent for cash.

Orders should be in soon, to get advantage of car-load rates.

## INCOME TAX RETURNS.

Government of Alberta

## IMPORTANT NOTICE

Income Tax Returns under the Provincial Income Tax are now due and should be filed with the Supt. of Income Tax, Qu'Appelle Bldg., Edmonton, before March 31st, 1933.

Forms may be procured from any Provincial Government office or from any bank or direct from the Superintendent of Income Tax, Edmonton.

All persons residing, employed or carrying on business in Alberta are liable to a tax on income subject to the exemptions provided for in the Act.

Full information re exemption and method of filing returns is contained on the forms themselves. Avoid penalty by filing now. Further information will be furnished on application to Income Tax Branch, Qu'Appelle Building, Edmonton.

**HON. R. G. REED,  
Provincial Treasurer.**      **E. M. GUNDERSON,  
Supt. of Income Tax.**
